STX2448

Digital Audio Processor

MANUAL DO USUÁRIO
USER MANUAL · MANUAL DE USUARIO · MANUALE UTENTE

Introduction

The **STX2448** is a digital audio processor that offers a huge range of high precision settings and configurations to improve the performance of your audio system. It has a Digital Signal Processor (DSP) that realizes equalizations, crossover filters, alignment, gain control, phase inversion, limiter, digital routing of inputs and outputs, among other treatments. Its new exclusive sequencer feature makes it possible to configure the programmed activation and shutdown of up to 3 products from the remote activation connections (REM).

Before installing

lease read this manual carefully.

・ All product connections must be made with the product turned OFF.

・ Use gauges recommended in this manual to avoid the overheating of the cables to obtain maximum power.

・ Keep the cables as short as possible to increase sound fidelity and avoid potential power losses.

・ Route the installation cables as far away as possible from the original vehicle wiring as it may cause interference and noise in your audio system.

・ Perform the installation in a firm, ventilated and dry place.

• Installation must be done by a qualified professional.

If you have questions , contact the store where the purchase or installation was made. For more information please contact our **Customer Service: BR +55 18 2104-9412**.

Resources

The **STX2448** has 2 inputs and 4 independent outputs that allow adjustments to the audio individually for each output through several functions and features integrated into the processor:

- Graphic input equalizer (15 bands and equalization presets)
- Parametric input equalizer (frequency, gain, Q factor)
- Parametric equalizer per output (frequency, gain, Q factor)
- Routing between inputs and outputs
- High precision crossover with Butterworth and Linkwitz-Riley filters and attenuations up to 48 dB/8th
- High precision alignment/delay
- Phase inversion
- Limiter with Threshould, Attack and Release adjustment
- Independent gain and mute per output and master volume
- Working memory with automatic saving of settings
- Allows you to save and load the settings made by the user
- Security password to block parameter modification
- Frequency generator, frequency sweep and pink noise generator
- Screen saver with rotating text
- Outputs for remote activation with configurable sequencing.

Any updates made in this manual will be available for costormers to consult without any charge on the brand's site.
It is recommended that the updated manual be consulted whenever needed.

Images contained in this manual are merely illustrative and may differ from the actual product.

Overview

1. SEQUENCER: It allows sequential activation of other products through the remote activation (REM) connection. Use a cable of at least **AWG 18**.

2. REM IN: Allows automatic activation of the amplifier when turning on the radio/player. Connect to the remote output of the radio/player mininum of **AWG 18**.

3. NEGATIVE POWER CONNECTOR (GND): Connect to the negative terminal of the battery using a cable minimum of **AWG 13**.

4. POSITIVE POWER CONNECTOR (+BAT): Connect to the positive terminal of the battery using a cable minimum of **AWG 13**. It is recommended to use a fuse for external protection of **1A**.

5. DISPLAY LCD: It allows visualization and interaction with the processor system.

6. ENCODER: Rotary control that allows interaction with the processor system functions and resources:

- **ENTER function:** Short press on the encoder.
- **RETURN function:** Long press on the encoder.

7. HOTKEYS: Shortcut keys for selecting output channels:

• **Short press:** Selects the channel for applying the parameters.

• **Long press:** Allows you to turn the selected output channel on or off.

HOTKEY on blue: output channel on.

HOTKEY lit red: output channel off.

8. LED LIMITER: The LEDs will light when the "LIMITER" of the channel in question is acting, they are also used as indicators of output saturation.

9. AUDIO INPUT (INPUT): RCA type connectors with independent actuation (A and B). Connect to the radio/player via quality shielded RCA cables to prevent noise.

10. AUDIO OUTPUT (OUTPUT): RCA connectors, provide the audio processed according to the settings made on the processor.
Navigation keys

Navigation and control of the **STX2448** are made via the **ENCODER** knob and the **HOTKEYS** hotkeys.

ENCODER	HOTKEYS
ROTATION: Navegation, increase and decrease in values.	**SHORT PRESS:** Select output channel.
SHORT PRESS: Enter, select, skip parameter.	**LONG PRESS:** Output ON/OFF.
LONG PRESS: Return to the previous screen.	
Settings map

Find the desired configuration from the illustration below with all configurations and processor features:

Main Menu

- **Audio Processing**
  - Graphic Input Equalizer
  - Parametric Input Equalizer
  - Parametric Output Equalizer
  - Routing Audio
  - Crossover
  - Delay
  - Phase
  - Limiter
  - Gain
  - Mute
- **Graphic Equalizer Presets**
- **Save**
- **Load**
- **Security**
  - Lock/Unlock
  - Charge Password
- **Tools**
  - Tone Generator
  - Frequency Sweep
- **Screensaver**
- **Language**
- **Sequencer**
  - Time
  - ON/OFF
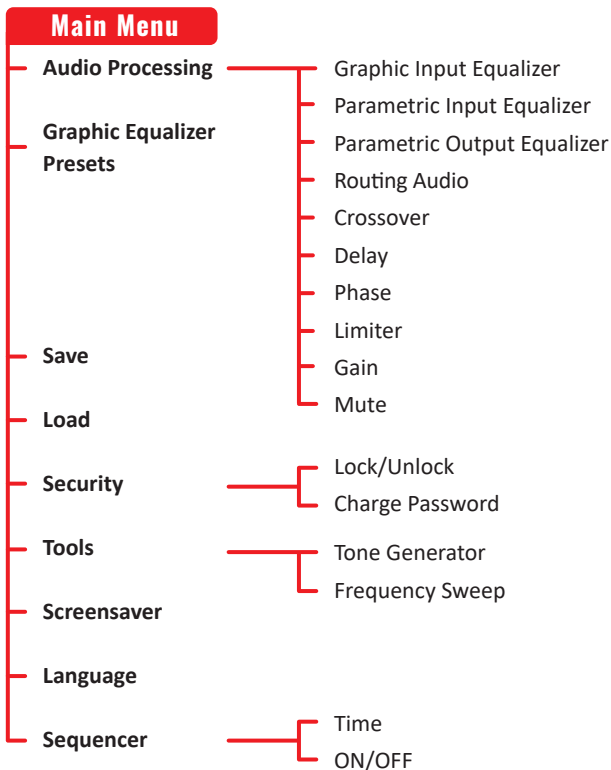

Processor features

• Graphic Input Equalizer

The input graphic equalizer has 15 bands, allowing a variation of ± 12 dB per band, with a pitch of 0.1 dB, with frequencies equally spaced in 2/3 octave, in the range of 25 to 16 kHz in accordance with ISO requirements . The graphic equalizer acts on the two inputs simultaneously.

```
     GRAPHIC EQ
  f: 63 Hz +2.6 dB
```

## • Parametric Input/Output Equalizer

The parametric equalizer allows you to choose a gain / attenuation at a specific frequency, as well as the bandwidth of that equalizer by means of the Q factor, the smaller the Q the greater the width of that equalization band, affecting to a greater extent the neighboring frequencies .

The **STX2448** has 5 parametric equalizers distributed as follows, 1 for the inputs and 4 for the outputs (1 for output).

```
   PARAMETRIC EQ
   freq.: 214 Hz
```

```
   PARAMETRIC EQ
   gain: +3.2 dB
```

```
   PARAMETRIC EQ
      Q: 1.4
```

• Input and Output Routing

The purpose of the routing option allows you select the audio source A, B or A + B (sum) for each output. Turning the **ENCODER** dial moves the audio source to the selected route. To select another channel, quickly press the corresponding **HOTKEY.**

```
      ROUTING
  IN A+B ---> OUT1
```
• Crossover

This function allows precision definition of the cutoff frequencies for the high-pass filter and the low-pass filter, as well as filter attenuations and topology individually by output. The available filters and attenuations are:

HPF: Butterworth   12/18/24/36/48 dB/8ª
Linkwitz-Riley 12/18/24/36/48 dB/8ª

LPF: Butterworth   12/18/24/36 dB/8ª
Linkwitz-Riley 12/18/24/36 dB/8ª

```
     HPF OUT
  f:12 Hz LR48
```

```
     LPF OUT1
  f:107 Hz BT12
```

In the **"CROSSOVER"** menu, each short press on the **ENCODER** changes the parameter being edited, between output, filter type, frequency and attenuation/topology. To select another output channel for editing, short press the **HOTKEY** key on the corresponding output.

• Balance / Delay

This function allows for the digital alignment of transducers (speakers) via the time correction performed by the DSP, and ensures that the sound from all the speakers arrives at the listener with improved audio fidelity while avoiding frequency cancellations.

The adjustment can be carried out as follows:

```
    DELAY OUT1
  12.0cm 0.349ms
```

1. Identify the coil farthest from the listener or the front panel of the box. This coil will be used as a reference;

2. Measure the distance from the other coils to the reference coil. These are the distances used in configuring the delay of each output channel.

Case Front Panel

23cm   18cm   12cm

Reference (*)
• Phase

This function is used for resolving problems caused by canceling frequencies. From this screen you can reverse the phase of all outputs individually. Turning the "Encoder" dial changes the phase (0° ou 180°) of the corresponding output. To select another channel, quickly press the corresponding **HOTKEY** shortcut.

```
      PHASE
    OUT1:180
```

• Limiter

To protect your amplifiers and speakers, the **STX2448** has a limiter with an integrated "Dynamic Attack-Release" system for each of the 4 outputs. Use this function to attenuate and prevent damage to the system caused by signal peaks.

The Threshold (-24 to 0dB) setting defines a threshold for the Limiter's activation: the Limiter kicks in when this threshold is exceeded.

The Attack parameter (0.1 to 100 ms) defines how fast the Limiter reacts / acts when the signal exceeds the Threshold.

The Release parameter (1 to 1600 ms) controls the recovery time elapsed between the time the signal falls below the Threshold and deactivation of the Limiter.

In addition to manual adjustments of Attack and Release values, it is possible to enable the "AUTO" mode, where the Attack and Release parameters are controlled in real time by the "Dynamic Attack-Release" system, providing ideal conditions for sound fidelity.

```
      LIMITER
   THRES.: -9.5 dB
```

```
      LIMITER
   RELEASE: 500 ms
```

```
      LIMITER
   ATTACK: 0.1 ms
```

```
    LIMITER OUT1
   AUTO: OFF    [ON]
```

• Gain

This menu allows you to adjust the gains of the individual outputs within a range of -45 to +15 dB, as well as to increase the master volume from 0 to 100%.

```
   MASTER LVL:    82%
    OUT1 GAIN: +3dB
```

• Mute

The outputs can be switched individually on and off quickly by holding down the **HOTKEY** key that corresponds to the output. The LED color indicates the status of the output.

BLUE LIGHT: OUTPUT ON / RED LIGHT: OUTPUT OFF (MUTE)

In the **"MUTE"** screen, you can still turn off and on all the output channels simultaneously using the **ENCODER** go to the output field and select **"ALL-ENTER"** or **"ALL-ENTER ON".** Then fast touch on **ENCODER**. You can also turn the input graphic equalizer on or off.

```
      OUT1: ON
  GRAPH EQ: ON
```

```
MUTE ALL (ENTER)
  GRAPH EQ: ON
```

```
ON ALL [ENTER]
  GRAPH EQ: ON
```

• Graphic Equalization Presets

The **STX2448** offers 12 graphic equalization presets that are selected from the **"GRAPH EQ PRESETS "** in the main menu:

• FLAT	• LOUDNESS	• BASSBOOST	• MID BASS	• TREBLE BOOST
• POWERFUL	• ELECTRONIC	• ROCK	• HIP HOP	• POP
• VOCAL	• PANCADAO (Heavy Beat)			

```
   MAIN MENU
Graph EQ Presets
```

```
GRAPH EQ PRESETS
   Loudness
```

• Save / Load / Factory Reset

The **STX2448** has 5 memory slots available for saving personalized settings, accessed via the **"SAVE"** function. Saved settings can be named with titles up to 15-characters long. Besides the memory space available to the user, there is autosave, where all parameters and settings are saved in a separate working

memory. Or rather, if there is a drop in power or the product is turned off during configuration, the settings will not be lost. This function cannot be disabled.

```
SAVE MEMORY1
    Memory1
```

To load previously saved settings use the **"LOAD"** function. This function also allows the factory presents to be loaded via the **"DEFAULT"** memory.

```
    LOAD
   Default
```

```
FACTORY RESET
NO       [YES]
```

> If you want to restore all of the **STX2448** factory settings, simultaneously hold down the **HOTKEY** shortcut keys for outputs 1, 2 and 3 while turning on the device.
> This procedure will erase all internal settings and saves.

• Security

This function locks the ability to edit settings, including blocking the save and load settings. Via the **"SECURITY"** menu you can lock or unlock **("LOCK/ UNLOCK")** and change the password **("CHANGE PASSWORD")**.
The function on/off the output channels is not blocked.

Default password: **STET (all caps)**

```
   SECURITY
  Lock/Unlock
```
▶
```
ENTER PASSWORD
     ____
```

```
   SECURITY
 Charge Password
```
▶
```
CHARGE PASSWORD
Current PW:____
```

• Tools

The audio processor has tools to aid in the regulation of your sound system, **TONE GENERATOR, FREQUENCY SWEEP and PINK NOISE GENERATOR**. These tools are signal sources for all outputs, that is, during their use as inputs.

Tone Generator: Generate a specific frequency with gain control.
Each press on the **ENCODER** parameter is edited between frequency, gain and ON/OFF. With the generator on it is still possible to change the frequency and gain in real time, and even modify other audio parameters of the processor.

```
TONE GENERATOR
  freq: 100 Hz
```

```
TONE GENERATOR
 gain: -45.0 dB
```

```
TONE GENERATOR
  OFF    [ON]
```

Frequency Sweep: Allows you to perform a frequency scan, with the option of selecting the initial and final frequency, gain, scanning speed and ON/OFF. When activating the sweep enters a continuous cycle, to close it simply press any of the **HOTKEYS** or move the **ENCODER**.
```
FREQUENCY SWEEP
  start: 10 Hz
```

```
FREQUENCY SWEEP
 end: 22000 Hz
```

```
FREQUENCY SWEEP
 gain: -45.0 dB
```

```
FREQUENCY SWEEP
 speed:medium
```

```
FREQUENCY SWEEP
  OFF    [ON]
```

• Screensaver

The audio processor has a screensaver function, which allows the user to define a 15-character scrolling text.

```
    SCREENSAVER
 Stetsom STX2448
```

• Language

You can select from the following operating languages: English, Spanish and Portuguese.

```
     LANGUAGE
  << ENGLISH >>
```

• Sequencer

This feature allows you to activate several products sequentially.

The sequencer has three outputs **(S1, S2 and S3)** that are activated and deactivated sequentially according to the input signal of the remote input (REM IN).

The activation interval between each output can be configured from 0s to 4s.

When the configured time is 0s, the three outputs will be enabled and disabled at the same time, after 3s of the absence of the remote signal at the input (REM IN).

To connect the remote signals, use cables of at least **18 AWG**.

It is possible to turn ON/OFF each sequencer output independently.

When the output is turned off, it will not trigger when the processor is turned on again.

```
     MAIN MENU
     Sequencer
```

```
     SEQUENCER

Total Harmonic Distortion (T.H.D):	**<0,01%**
Channel Separation:	**>80dB**
Frequency Response:	**10Hz ~ 22.5kHz @ -1dB**
Power supply:	**9V ~ 16V DC**
Max. Current Consumption:	**350mA @ 12.6V DC**
Dimensions (W x H x D):	**37 x 200 x 101 mm**
Weight:	**455g**

Warranty Term

STETSOM, through its network of Authorized Technical Assistance Providers, guarantees technical assistance to the purchaser of their products. The repairs of any defects duly established as being of the manufacturer will be done without cost for replacement components or parts and repair labor. The repairs will be done by the Authorized Technical Assistance Provider specially designated by STETSOM.

CONSULT THE LIST OF AUTHORIZED TECHNICAL ASSISTANCE PROVIDERS ON OUR WEBSITE: : **www.stetsom.com.br/en/assistencias-tecnica**
If you do not locate technical assistance in your city, please contact us at:
BR +55 18 2104-9412

WARRANTY CONDITIONS:
Our warranty is 1 (one) year against manufacturing defects. Its validity starts on the date of the Sale to the FINAL Consumer.
To claim the benefits of this warranty, you must present one of the following documents: the Final Consumer's SALE NOTE or this completed CERTIFICATE.

SITUATIONS THAT VOID THE WARRANTY:
1. 1 year after the issuance of the invoice of sale to the consumer or 1 year after the certificate of warranty is filled out (dated and stamped by the retailer or installer) or 1 year from date of manufacture.
2. Violation of seals, alteration or removal of the product's serial or lot number.
3. If the product suffers misuse or careless accidents involving: Water, Fire or Fall, or is installed in conditions contrary to the guidelines contained in the installation manual that accompanies the product.
4. Damages and changes in the circuit or adaptation of non-original parts.
5. If you use installation techniques contrary to those given in the manual.

QUESTIONS AND ADVICE:
STETSOM offers Customer Services to answer questions and give advice about their products and services. Please contact us through the channels:
